

# -on a foundation of 68 years

THE same 68 years of science that have expanded the blacksmith's forge into a steel industry have likewise expanded the apothecary's mortar into a massive service bottomed on the broad base of human needs.

Into this era of marvels was born the brand new science of bacteriology; it found laws of disease and founded preventive medicine; it produced antiseptics, reduced hygiene to known principles, revolutionized materia medica, and evolved the greatest chemical movement of all times.

Embodying the complete development of the science of chemistry stands the largest drug house in the world—the Meyer Brothers Drug Company. The quality of Meyer drugs—made pure, kept pure, certified by test and distributed in original packages, is the achievement of 68 years.

You may exist on second-class food, but you cannot get well on second-class drugs.

You realize that you are taking better care of your health every day in respect of your food. People no longer feel safe in buying food in bulk that may be dumped here, there and everywhere, exposed to dust, dirt and bacteria.

Every package of Meyer Certified products contains a certificate of the actual tests which science has compelled for the determination of its quality and purity.

You can tell them by the trade-mark that is a grade-mark—the sure sign of purity—

It is just as easy to ask for Meyer drugs and get pure drugs.

For sale at your drug store.
